optimization and performance analysis pdf

Performance tuning is the improvement of system performance. Typically in computer systems, the motivation for such activity is called a performance problem, which can be either real or anticipated.

Performance tuning - Wikipedia

So to address performance optimization, here are three different areas to address: Processing Performance. During processing, SSAS refreshes the Cube/OLAP store with the latest data from the source systems and relational data warehouse and generates aggregates if any are defined.

SSAS - Best Practices and Performance Optimization - Part

Business performance management is a set of performance management and analytic processes that enables the management of an organization's performance to achieve one or more pre-selected goals.

Business performance management - Wikipedia

Deterministic modeling process is presented in the context of linear programs (LP). LP models are easy to solve computationally and have a wide range of applications in diverse fields. This site provides solution algorithms and the needed sensitivity analysis since the solution to a practical problem is not complete with the mere determination ...
