Primate Characteristics - San Jose State University

Next, the presentation shows photographs of chimpanzees, gorillas, and other primates and suggests that if humans have evolved from other animals, those animals were almost certainly primates. Slides are shown of a diverse array of living primates from Prosimians to the chimpanzee (including all the primates listed in Table 1), along with a brief natural history of each species.

Primate Seasonality Studies Of Living And Extinct Human

Seeing in Stereo: People and most other primates make a poor showing when their sense of smell is compared with that of other mammals. But when it comes to eyesight, they rank far above the others. They can see colorâ€”an unusual ability among the mammalsâ€”and their eyes face forward so that the view each of their eyes perceives overlaps with that of the other eye. This overlapping eyesight ...
