Photovoltaics and photoactive materials - properties

The primary objective of this NATO Advanced Study Institute (ASI) was to present an up-to-date overview of various current areas of interest in the field of photovoltaic and related photoactive materials. This is a wide-ranging subject area, of significant commercial and environmental interest, and

Photovoltaic and Photoactive Materials - Properties

The primary objective of this NATO Advanced Study Institute (ASI) was to present an up-to-date overview of various current areas of interest in the field of photovoltaic and related photoactive materials.

Proceedings of the NATD Advanced Study Institute on Photovoltaic and Photoactive Materials - Properties, Technology and Applications Sozopol, Bulgaria

Photovoltaic and Photoactive Materials - Properties

Organic photovoltaic materials have the potential to revolutionize the solar energy industry as they are compatible with printing technologies that produce thin, flexible solar cells. In order for such material to be commercially viable, high power conversion efficiency (PCE) is necessary. The PCE of organic photovoltaic cells is largely determined by the material in the photoactive layer ...

Recently developed high-efficiency organic photoactive

Both types of solar cells comprising TMCMT as photoactive material showed clear photovoltaic effects. This proves for the first time the feasibility of the previously anticipated idea of using trannulenes as light-harvesting materials in photovoltaic devices.

Trannulenes: a new class of photoactive materials for

I Abstract This thesis investigates lead oxides as photovoltaic materials. Vacuum deposition methods and ex-situ annealing are used to produce different stoichiometries of lead oxide.

Lead Oxides for Photovoltaics - Solar Energy Materials

A proof-of-concept for the fabrication of genetically customizable biogenic materials for photovoltaic applications is presented. E. coli is first genetically engineered to heterologously express the carotenoid biosynthetic pathway from plants.

A Biogenic Photovoltaic Material - Srivastava - 2018

Photovoltaic and photoactive materials" properties

Photovoltaic cells, also called solar cells, can convert light, such as sunlight, into electrical energy. A typical photovoltaic cell includes a layer of a photoactive material disposed between a cathode and an anode.
